General instructions:
To optimize the performance of this product, please read these operating instructions carefully to familiarize yourself with the basic operations of this unit. These instructions contain important safety information regarding the use and maintenance of this unit. Please keep this manual with the unit, for future reference.

Unpacking:
Thank you for purchasing the Gobo Projector LED™ by American DJ®. Every Gobo Projector LED™ has been thoroughly tested and has been shipped in perfect operating condition. Carefully check the shipping carton for damage that may have occurred during shipping. If the carton appears to be damaged, carefully inspect your unit for any damage and be sure all equipment necessary to operate the system has arrived intact. In the event damage has been found or parts are missing, please contact our toll free customer support number for further instructions. Please do not return the unit to your dealer without first contacting customer support.

Customer Support:
American DJ® provides a toll free customer support line, to provide set up help and to answer any question should you encounter problems during your set up or initial operation. You may also visit us on the web at www.americandj.com for any comments or suggestions. For service related issue please contact American DJ®. Service Hours are Monday through Friday 9:00 a.m. to 5:00 p.m. Pacific Standard Time.

Voice: (800) 322-6337
Fax: (323) 582-2941
E-mail: support@americandj.com

Warning! To prevent or reduce the risk of electrical shock or fire, do not expose this unit to rain or moisture.

Caution! There are no user serviceable parts inside this unit. Do not attempt any repairs yourself, doing so will void your manufactures warranty. In the unlikely event your unit may require service please contact your nearest American DJ dealer.

PLEASE do not discard the shipping carton in the trash. Please recycle when ever possible.
Gobo Projector LED™ Precautions

Safety Issue: This unit may blow the fuse if the maximum allotted load of 2 amps is reached. If the fuse needs replacement, please see fuse replacement on page 5.
- Be sure the local power outlet match the required voltage of the unit.
- Disconnect from main power before making any type of connection.
- Do not remove the cover under any conditions. There are no user serviceable parts inside.
- Always be sure to mount this unit in an area that will allow proper ventilation. Allow about 6" (15cm) between this device and a wall.
- To reduce the risk of electrical shock or fire, do not expose this unit to rain or moisture.
- This unit is intended for indoor use only, use of this product outdoors voids all warranties.
- During long periods of non-use, disconnect the unit’s main power.
- Always mount this unit in safe and stable matter.
- Power-Cord Protection - Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the fixture. Do not attempt to remove or break off the ground prong from the electrical cord. This prong is used to reduce the risk of electrical shock and fire in case of an internal short.
- The fixture should be serviced by qualified service personnel when:
  A. The power cord or the plug has been damaged.
  B. Objects have fallen, or liquid has been spilled into the appliance.
  C. The appliance has been exposed to rain or water.
  D. The fixture does not appear to operate normally or exhibits a marked change in performance.

Gobo Projector LED™ Operation

Introduction: The American DJ® Gobo Projector LED™ is a rotating gobo projector. This fixture is designed for mobile DJ’s, clubs, bands, roller rinks and any arena that requires a compact, light weight, easy to use unit.

Power Supply: Before plugging your unit in, be sure the source voltage in your area matches the required voltage for your American DJ® Gobo Projector LED™ before attempting operation.

Operation: This fixture is designed to operate as a stand alone, rotating gobo projector, there is no need of a controller. It has been tested and there is no assembly necessary. The Gobo Projector LED™ is ready to be plugged in out of the box. Only use the included I.E.C. power cable supplied with the unit. When this fixture is plugged in, the unit will project the included gobo. Using the switch located at the back of the unit, you can make the gobo remain static or make the gobo rotate counter-clockwise.

After plugging the unit if there is no LED output check the fuse. If the fuse has not popped, please contact customer support for further instructions. This fixture features a light weight case design and an adjustable hanging bracket.

Gobo Projector LED™ Gobo Replacement

The Gobo Projector LED™ comes with a replaceable gobo. This gobo can be interchanged at any time and allows you to customize your system.

To replace gobo:
1. Unscrew the two screws located at the top that hold the gobo housing.
2. Remove the gobo housing.
3. Once the gobo housing has been removed, remove the retaining ring that holds the gobo in. This can easily be done using needle nose pliers.
4. Remove and replace the gobo with your desired replacement.
5. Slide the gobo assembly back into place, and secure the housing with two screws.
**Trouble Shooting:**

Listed below are a few common problems that you may encounter, with solutions.

**No light output from the unit;**
1. Be sure you have connected your unit into a matching wall power outlet.
2. Be sure the fuse has not popped. The fuse is located on the rear panel.

**Fixture Cleaning:**

Due to fog residue, smoke, and dust cleaning the internal and external optical lenses should be carried out periodically to optimize light output. Cleaning frequency depends on the environment in which the fixture operates (i.e. smoke, fog residue, dust, dew). In heavy club use we recommend cleaning on a monthly basis. Periodic cleaning will ensure longevity, and crisp output.

1. Use normal glass cleaner and a soft cloth to wipe down the outside casing.
2. Clean the external optics with glass cleaner and a soft cloth every 20 days.
3. Clean the internal optics with glass cleaner and a soft cloth every 30-60 days.
4. Always be sure to dry all parts completely before plugging the unit back in.

**Fuse Replacement**

Locate and remove the unit’s power cord. Once the cord has been removed locate the fuse holder located inside the power socket. Insert a flat-head screw driver into the power socket and gently pry out the fuse holder. Remove the bad fuse and replace with a new one. The fuse holder has a built-in socket for a spare fuse be sure not to confuse the spare fuse with active fuse.

**Cleaning**

Due to fog residue, smoke, and dust cleaning the internal and external optical lenses should be carried out periodically to optimize light output. Cleaning frequency depends on the environment in which the fixture operates (i.e. smoke, fog residue, dust, dew). In heavy club use we recommend cleaning on a monthly basis. Periodic cleaning will ensure longevity, and crisp output.

1. Use normal glass cleaner and a soft cloth to wipe down the outside casing.
2. Clean the external optics with glass cleaner and a soft cloth every 20 days.
3. Clean the internal optics with glass cleaner and a soft cloth every 30-60 days.
4. Always be sure to dry all parts completely before plugging the unit back in.
